

Biometric Information Consent and Authorization

We require your consent to use biometrics to help verify your identity and age.

MG Social Ltd (“**MyDirtyHobby**”) employs third-party service providers to help verify your identity and age, and to check the authenticity of any identification documents you may provide, using facial recognition technology. The facial recognition technology creates a mathematical representation of your face and detects facial features from the live scan of your face, your selfie, and the government-issued ID you submit or previously submitted to us. This mathematical representation, which is considered biometric information/identifier/data under the laws of certain states and countries, is not shared by our service providers with us, and is deleted by our service providers seven (7) days after its creation.

Information derived from this mathematical representation, however, which may be considered biometric information/identifier/data under the laws of certain states and countries, is shared by our service providers with us and is deleted by us as further described below.

Your biometric information will be used to:

- verify you are a real, live person and to prevent the use of methods which would allow a user to identify as someone else.
- to match your selfie with your government-issued ID you submit or have previously submitted to us to make sure that nobody is impersonating you.
- to help confirm your age.

By providing your consent (ticking the analogous box), you agree that MyDirtyHobby may disclose your biometric information, face scan, selfie, and government-issued ID (including any government-issued ID or selfie you previously submitted to MyDirtyHobby) with members of MyDirtyHobby’s corporate group, and with third-party service providers. These entities may be located in jurisdictions that do not offer the same level of data protection as your jurisdiction. You consent to any of these entities (i) performing facial recognition and collecting your biometric information from your face scan, selfie, and any government-issued ID, and (ii) using your biometric information for the above purposes.

Your biometric information shared by our service providers with us will be stored for as long as you maintain an account on the Sites. We will delete your biometric information within three (3) years of you deleting your account or withdrawing your consent, subject to any further, legal obligations we may have.

You may withdraw your consent to this processing at any time, as explained in our Privacy Policy, but withdrawing your consent will not affect the lawfulness of any collection, use, processing, or disclosure that occurred prior to the withdrawal.
